Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 10/31/2024, Frico 36-15 wellhead decommissioning activity was completed. During the completion of the activities, no potential presence of impacted material(s) was observed/smelled. Consistent with Rule 912, samples were collected and analyzed to determine whether any constituents are present at levels in excess of Table 915-1 standards. Final laboratory analytical results received on 12/11/2024, indicate the soil sample, WH01-W, discovered at the wellhead exceeded ECMC Table 915 standards for 1-methylnaphthalene at 0.016 mg/kg. Groundwater was not encountered during decommissioning activities. This location is within the following High Priority Habitats: Mule Deer Severe Winter Range, Bald Eagle Roost Site, and Bald Eagle Active Nest Site. A supplemental form 27 has been submitted to REM 34446 detailing the remedial site plan, document number 404023795.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 03/11/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered during wellhead decommissioning activities at the west sidewall of the wellhead excavation. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

Noble conducts routine AVO inspections of all oil and gas wellheads in order to identify and mitigate potential releases. Further, this wellhead is no longer active and is in the process of being decommissioned. The wellhead has been taken out of service, and there is no longer a possibility of a release originating from this infrastructure.

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

- Basis for Closure:
- Corrective Actions Completed (documentation attached, check all that apply)
 - Horizontal and Vertical extents of impacts have been delineated.
 - Documentation of compliance with Table 915-1 is attached.
 - All E&P Waste has been properly treated or disposed.
 - Work proceeding under an approved Form 27 (Rule 912.c).
Form 27 Remediation Project No: 34446
