Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 3/10/2025, the potential presence of impacted material(s) was identified via hydrocarbon odor during decommissioning activities at the BASHOR PC AA 09-14 TANK, facility, samples: SEP01-FL@3' and SEP02-DL@3'. The volume of potentially impacted material(s) is not currently known. Initial soil sampling is underway to determine whether any constituents are present at levels in excess of Table 915-1 standards. Groundwater was not encountered during decommissioning activities. This location is within the following High Priority Habitats: Mule Deer Severe Winter Range. Pronghorn Winter Concentration. Final analytical results from initial soil sampling will be included on a Supplemental Form 19.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 03/12/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Horizontal Separator

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered during tank battery decommissioning activities at the separator dump line and separator flowline riser. The volume of potentially impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

Noble conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this facility is no longer active and is in the process of being decommissioned. The separator has been taken out of service and there is no longer a possibility of a release originating from this infrastructure.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE
