Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECOM is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The treater lost gas pressure and oil tanks leaked 10 bbls oil. The wells were shut in and all valves on treater were shut in. All fluid was contained inside the berms and then recovered with a vacuum truck. Contaminated dirt was immediately removed and stockpiled on location.

Soil samples were collected on 4/15/2024, 7/24/2024 Excavation was conducted in September and additional soil samples were collected on 10/11/2024 and analyzed for Boron, EC, pH and SAR.

Excavation of the impacted area was completed in September 2024, and additional sampling was completed on 10/11/2024. Four excavation wall samples, and one floor sample were taken at 3' & 4' depth of the excavation area. These samples were analyzed for SSR constituents.

Following points are determined to have impacts still:

EX01 @ 3' (pH) & 4' (pH & SAR), EX03 @ 3' & 4' (pH & SAR), F01 @ 3' & 4' (pH & SAR)
SP7 @ 18" & 2' (SAR), SP6 @ 18" (pH & SAR) & 2' (SAR), SP8 @ 18" (SAR), SP9 @ 18" & 2' (SAR), SP5 @ 18" (SAR & pH), SP2 @ 18" (pH & SAR) & 2' (SAR), and SP3 @ 18" (pH & SAR) & 2' (SAR)

Sample locations, lat/longs, and soil sampling maps have been provided in the Site Investigation Plan.
