Title/Sample ID	EX01 @ 3' & EX01 @ 4'
 A photograph of an excavation site. In the foreground, two Ziploc bags are visible. The top bag is labeled "Ziploc EX01 @ 3' PID 1.5" and the bottom bag is labeled "Ziploc EX01 @ 4' PID 1.6". The bags are placed on a pile of excavated soil. In the background, a deep, circular excavation hole is visible, with a vertical string or wire hanging down into it. The soil is light brown and appears to be dry and crumbly. The lighting suggests it is daytime, with shadows cast on the soil.

Title/Sample ID	EX02 @ 3' & EX02 @ 4'
 A photograph showing two clear plastic sample bags with purple zippers lying on a rocky, light-colored soil surface. The bags are labeled with handwritten text: the top bag says "EX02 @ 3' PID 5.8" and the bottom bag says "EX02 @ 4' PID 1.5". The background is a rough, excavated earth face with some shadows.

Title/Sample ID	F01 @ 3' & F01 @ 4'
 A photograph showing two clear Ziploc bags filled with soil, placed on a pile of excavated earth. The bag on the left is labeled "Ziploc F01 @ 3' PID 1.8" and the bag on the right is labeled "Ziploc F01 @ 4' PID 1.9". Both bags have a "FOLD & FILL" instruction and a small icon of a bucket. The background shows a rough, uneven surface of soil and rocks, with a shadow cast across it.	

Title/Sample ID	BG1 @ 2' & BG1 @ 3' & BG1 @ 4'
 Three clear Ziploc bags filled with soil, stacked vertically. The top bag is labeled "Ziploc BG1 @ 2' PID 1.9". The middle bag is labeled "Ziploc BG1 @ 3' PID 1.6". The bottom bag is labeled "Ziploc BG1 @ 4' PID 0.5". Each bag has a "FOLD & FILL" instruction and a small icon of a bucket.	 A circular hole in the ground, likely a borehole, surrounded by soil and debris. The hole is approximately 12 inches in diameter and appears to be about 4 feet deep. The soil around the hole is dark and moist.

TENORM APPLICABILITY AND EVALUATION

BACKGROUND: On November 7, 2017 the Colorado Department of Public Health & Environment (CDPHE) issued a letter to address management of specific Exploration and Production (E&P) waste streams with the potential for high concentrations of TENORM. Effective as of the issue of the letter, the specific waste streams listed below are prohibited from disposal in all landfills in Colorado not specifically approved and designated to take them unless and until each waste is sampled and tested on a per shipment basis or in a representative and statistically valid manner consistent with the guidelines provided by CDPHE in Attachment B to the 11/07/17 letter and found to contain TENORM at levels less than the administrative release levels listed below.

Applicable Waste Streams

- Tank bottoms (solids and liquids)
- Filter socks
- Filter press cake or sludge
- Discarded pipe and flow line sections
- Residual materials dislodged during cleaning and maintenance activities on pipelines, flow lines, connector pipes, tanks and vessels

Administrative Release Levels (after background levels subtracted):

- Combined Radium 226 + Radium 228 must be less than 3 picocuries/gram (pCi/g)
- Natural Uranium must be less than 30 pCi/g
- Natural Thorium must be less than 3 pCi/g

DIRECTIONS: Please answer all waste characterization questions below. If the waste to be managed under this profile is one of the applicable waste streams listed above, please also provide a copy of applicable analytical. Note that for 'dynamic' wastes (see definition below), analytical will be required for each load and/or batch of waste.

WASTE CHARACTERIZATION	YES	NO
1. Does the waste to be included under this profile include any of the waste streams identified by CDPHE as having the potential for high concentrations of TENORM (see 'Applicable Waste Streams', above)? ➤ If 'NO', sign and certify below. No further action needed. ➤ If 'YES', complete questions 2 through 4 and provide copies of required analytical.		X
2. Are the radionuclide levels for the potential TENORM waste <u>less than</u> the Colorado Administrative Release Levels (see 'Administrative Release Levels', above), after subtraction of established background levels and following other characterization requirements in accordance with Attachment B of CDPHE's 11/07/17 letter?? ➤ If 'NO', waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options. ➤ If 'YES', please mark 'Yes' at right and proceed to question 3.		
3. Is the waste a 'static' waste stream (e.g. waste streams that are a result of an essentially constant and consistent process where the input materials are of a consistent character and the output residuals are expected to have little variability)? ➤ If 'NO', please mark 'No' at right and then skip to Question 4. ➤ If 'YES', please mark 'Yes' at right and complete the additional question below ➤ If 'YES', are the number of initial or periodic samples provided statistically significant in accordance with EPA Hazardous Waste Test Methods SW-846? <input type="checkbox"/> YES, samples provided are statistically significant. <input type="checkbox"/> NO, samples provided are not statistically significant. NOTE: If the samples provided are not statistically significant, then the waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options.		
4. Is the waste a 'dynamic' waste stream (e.g. waste streams that are the result of a process that is inherently variable in terms of the inputs into and/or outputs out of the process) and samples provided are representative of the waste to be shipped? NOTE: Radionuclide analytical must be provided from representative samples of the waste for each load and/or batch for 'dynamic' waste streams. ➤ If 'NO', please mark 'No' at right. NOTE: waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options. ➤ If 'YES', please mark 'Yes' at right and sign and certify below.		

GENERATOR CERTIFICATION: By signing this Generator's EZ Profile™ Addendum, I hereby certify that all information contained herein, and all attached documents, are a true, complete, and accurate description of the waste material being offered for disposal, and all necessary information has been provided to establish compliance with CDPHE's November 7, 2017 letter regarding acceptance of E&P waste streams with the potential for high concentrations of TENORM. All radionuclide analytical data provided was derived from sample(s) that were collected and analyzed in accordance with the requirements of Attachment B to CDPHE's November 7, 2017 letter. Any change in information regarding the nature or character of the material offered for disposal (i.e., changes in the process or new analytical data) will be identified by the Generator and will be disclosed to Waste Management prior to providing the material to Waste Management.

TENORM APPLICABILITY AND EVALUATION

BACKGROUND: On November 7, 2017 the Colorado Department of Public Health & Environment (CDPHE) issued a letter to address management of specific Exploration and Production (E&P) waste streams with the potential for high concentrations of TENORM. Effective as of the issue of the letter, the specific waste streams listed below are prohibited from disposal in all landfills in Colorado not specifically approved and designated to take them unless and until each waste is sampled and tested on a per shipment basis or in a representative and statistically valid manner consistent with the guidelines provided by CDPHE in Attachment B to the 11/07/17 letter and found to contain TENORM at levels less than the administrative release levels listed below.

Applicable Waste Streams

- Tank bottoms (solids and liquids)
- Filter socks
- Filter press cake or sludge
- Discarded pipe and flow line sections
- Residual materials dislodged during cleaning and maintenance activities on pipelines, flow lines, connector pipes, tanks and vessels

Administrative Release Levels (after background levels subtracted):

- Combined Radium 226 + Radium 228 must be less than 3 picocuries/gram (pCi/g)
- Natural Uranium must be less than 30 pCi/g
- Natural Thorium must be less than 3 pCi/g

DIRECTIONS: Please answer all waste characterization questions below. If the waste to be managed under this profile is one of the applicable waste streams listed above, please also provide a copy of applicable analytical. Note that for 'dynamic' wastes (see definition below), analytical will be required for each load and/or batch of waste.

WASTE CHARACTERIZATION	YES	NO
1. Does the waste to be included under this profile include any of the waste streams identified by CDPHE as having the potential for high concentrations of TENORM (see 'Applicable Waste Streams', above)? ➤ If 'NO', sign and certify below. No further action needed. ➤ If 'YES', complete questions 2 through 4 and provide copies of required analytical.		X
2. Are the radionuclide levels for the potential TENORM waste <u>less than</u> the Colorado Administrative Release Levels (see 'Administrative Release Levels', above), after subtraction of established background levels and following other characterization requirements in accordance with Attachment B of CDPHE's 11/07/17 letter?? ➤ If 'NO', waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options. ➤ If 'YES', please mark 'Yes' at right and proceed to question 3.		
3. Is the waste a 'static' waste stream (e.g. waste streams that are a result of an essentially constant and consistent process where the input materials are of a consistent character and the output residuals are expected to have little variability)? ➤ If 'NO', please mark 'No' at right and then skip to Question 4. ➤ If 'YES', please mark 'Yes' at right and complete the additional question below ➤ If 'YES', are the number of initial or periodic samples provided statistically significant in accordance with EPA Hazardous Waste Test Methods SW-846? <input type="checkbox"/> YES, samples provided are statistically significant. <input type="checkbox"/> NO, samples provided are not statistically significant. NOTE: If the samples provided are not statistically significant, then the waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options.		
4. Is the waste a 'dynamic' waste stream (e.g. waste streams that are the result of a process that is inherently variable in terms of the inputs into and/or outputs out of the process) and samples provided are representative of the waste to be shipped? NOTE: Radionuclide analytical must be provided from representative samples of the waste for each load and/or batch for 'dynamic' waste streams. ➤ If 'NO', please mark 'No' at right. NOTE: waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options. ➤ If 'YES', please mark 'Yes' at right and sign and certify below.		

GENERATOR CERTIFICATION: By signing this Generator's EZ Profile™ Addendum, I hereby certify that all information contained herein, and all attached documents, are a true, complete, and accurate description of the waste material being offered for disposal, and all necessary information has been provided to establish compliance with CDPHE's November 7, 2017 letter regarding acceptance of E&P waste streams with the potential for high concentrations of TENORM. All radionuclide analytical data provided was derived from sample(s) that were collected and analyzed in accordance with the requirements of Attachment B to CDPHE's November 7, 2017 letter. Any change in information regarding the nature or character of the material offered for disposal (i.e., changes in the process or new analytical data) will be identified by the Generator and will be disclosed to Waste Management prior to providing the material to Waste Management.

Attached is the final manifest for the State 1 and 3 Pit. I do apologize for it not being in the first attachment. There was a total of 32 loads. Please let me know if you would like me to re-scan the entire paperwork packet in order to have one complete file.

Thanks again,

Todd Troutman
