General Comment:

On 3/7/2025, Western Reclamation Work Lead Trujillo conducted an Interim Reclamation and Stormwater inspection at Laramie Energy LLC's Homer Deep Unit 9-11 location in Garfield County, Colorado.

Location is Federal Surface, Federal Mineral

The following compliance issues were observed during this inspection:

- Interim Reclamation
- Stormwater
- Undesirable Plant Establishment / Weed Debris

Refer to the Location, Reclamation and Stormwater sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Comment:	Undesirable Plant establishment (Salsola sp.) and weed debris accumulation observed throughout the Location; including the interim areas, slopes of the Location, edge of the working pad surface, within ditches/sediment traps/culverts, etc... Weed debris will require removal and proper disposal.		
Corrective Action:	Comply with Rule 606 and remove/properly dispose weed debris accumulation on the Location by 3/27/2025. Additional and ongoing weed management efforts will need to be performed during the 2025 growing season, to ensure Location remains free of Undesirable Plant Species, to comply with Rule 606.c		Date: 03/27/2025

1003 f. Weeds Noxious weeds? I

Comment

It was observed in this inspection that areas of the Location are not progressing towards ECMC 1003.e.(2) Reclamation Standards-there are interim areas of the Location that are bare and unvegetated, or dominated by Undesirable Plant Species including Salsola (Russian thistle), cheat grass, and/or other annual weeds; uniform perennial vegetative establishment is not progressing within these areas.

Additional reclamation efforts, such as weed management and inter-seeding, required to ensure site progresses towards ECMC uniform perennial revegetation requirements.

Corrective Action

Conduct additional reclamation efforts within areas of the Location not progressing towards 1003 Interim Reclamation requirements.

Date 04/30/2025

Overall Interim Reclamation Fail

Final Reclamation/ Abandoned Location:

Date Final Reclamation Started: _____ Date Final Reclamation Completed: _____

Well Release on Active Location

Multi-Well Location

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Culverts						
Sediment Traps						
Compaction		Compaction				Maintenance advised
Seeding	Fail					
Gravel		Gravel				Maintenance advised
Rip Rap						
	Fail					Slopes, NE end of Location
Ditches						

Comment: It was observed in this inspection that BMPs to minimize erosion and degradation at the slopes on the northeast end of the Location are missing or insufficient; areas appear to be topsoil stockpiled for future reclamation efforts. Soils are at risk to wind and water erosion; sediment migration onto the pad surface evident. These bare soils should also be included during additional reclamation efforts to ensure long term stabilization is achieved.

It was also observed that tracking and stabilization control measures are showing signs of disrepair at the working pad surface and access road; tracking and rutting are becoming evident. Maintenance advised to ensure BMPs remain in proper functioning condition.

Corrective Action: Comply with Rule 1002.f and install or maintain stormwater and erosion control BMPs in accordance with good engineering practices, to minimize erosion and degradation at the slopes on the Northeast end of the Location.

Date: 03/19/2025

Pits: NO SURFACE INDICATION OF PIT
