Comment: **This location does not comply with Rule 1004. During this inspection, it was observed that the location entrance and access road does not appear to have been reclaimed with culvert, cattle guard, gate and road base evident. Additionally, the former location doesn't appear to be progressing towards reclamation standards as the area is predominantly bare/unstabilized soils, with little evidence of desirable vegetation observed. Additional reclamation activities are required. Refer to attached inspection photos.**

Corrective Action:	Comply with Rule 1004. Reclaim access road, remove associated infrastructure and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.	Date _____
