

Wiepking Fullerton Energy LLC
Gaede Tank Battery
Final Reclamation Plan
03-17-2025

Location Details:

Operator Name: Wiepking Fullerton Energy LLC

Operator Number: 96340

Location Name: Gaede Tank Battery

Lat/Long: 39.2877787, -103.566736

Location ID: 467053

Reclamation Project Number: 38321

Summary:

The Gaede tank battery will begin final reclamation planning. The location has previously been included in a combined form 27 with the Gaede 8-16 well and location reclamation. Due to the nature of the duration of the projects, this location is being separated into its own (new) reclamation plan, and the Gaede 8-16 well and location will remain on its own (old) reclamation project.

Remediation plan forward 03/17/2025:

During Q1 of 2025, the location was unable to be accessed for soil sampling due to winter conditions. Snow and mud would have made the removal of equipment, or collection of soil samples inaccessible without the risk of cross-contamination. Soil sampling will occur in the late spring early summer once conditions approve, and the proposed soil sampling plan has been approved by the ECMC.

The operator has attached an updated tank battery site map with proposed soil sample locations. All (7) proposed in-situ proposed sample points are at critical connection points where contamination would be the highest chance of occurring. The tank farm is located inside a lined metal containment. Once tanks and containment are removed, if there are any locations that appear to have additional contamination, or if containment has damage indicating potential for contamination, additional soil samples will be taken. If there are any spills or groundwater, additional samples and reporting will ensue.

Proposed Sample Locations

Location	Sample Type	Lat	Long
Gaede Tank Battery	Tank Loadout 1	39.287866	-103.566330
Gaede Tank Battery	Tank Loadout 2	39.287779	-103.566322
Gaede Tank Battery	Tank Inlet 1	39.287712	-103.566251
Gaede Tank Battery	Tank Inlet 2	39.287715	-103.566174
Gaede Tank Battery	ECD	39.288081	-103.566218
Gaede Tank Battery	Treater Farm	39.287778	-103.566778
Gaede Tank Battery	Treater Flowlines	39.287834	-103.566682
Gaede Tank Battery	Background	39.287472	-103.567209
