**INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the WILMOTH 14-03 wellhead cut and cap and flowline removal. The wellhead was cut and capped per ECMC rules. Approximately 571' of flowline was removed. Three (3) grab soil samples were collected at the wellhead excavation (1) and flowline terminuses at the wellhead and separator (2). Additionally, soil samples were field screened at the N-E-S-W sides of the wellhead, and along the flowline at change of directions. Soil samples were analyzed by a certified laboratory for the full extent of Table 915-1, including: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per ECMC Table 915-1, EC, SAR, pH, metals, and boron. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

**OPERATOR COMMENT**

This is a quarterly timeline update.

In response to ECMC Form 27 Comment dated 12/12/2024 (Document Number 403946408), Operator is submitting available site data with original laboratory reports includes as separate attachments. Based on currently available data, this project is not affected by data integrity irregularities and is not associated with Operator's data integrity review process and its Rule 525.e. Voluntary Disclosure. As part of its data integrity review process, Operator requested the lab protect the laboratory analytical reports from subsequent unauthorized modification by anyone outside the lab, which resulted in the lab reissuing the original reports with additional protections (Reissued Report). The Reissued Reports were received directly from the lab on 2/13/2025 which includes a watermark confirming both the laboratory representative who reissued the report and the date and time of the reissuance. The metadata associated with these Reissued Reports also includes the lab representative's name, the date and time the laboratory reissued the reports, and an explanation for the reports reissuance. The Reissued Reports are attached to this submission.

In the event additional responsive information is received or discovered that would suggest this project should be incorporated into the ongoing data integrity review process associated with Operator's Rule 525.e. Voluntary Disclosure, Operator will update and/or amend the statements in this submission and provide any new or revised data or other information responsive to ECMC's general comments responding to Operator's Form 27 submission found in Document Number 403946408.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
