Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

The landowner notified KPK and the Fort Lupton Fire Department of a spill associated with the Hazel McHale #2 flowline. KPK immediately responded, shut in the well & blew down the flowline. KPK began excavating the impacted soil to expose the line and perform the necessary repairs. The impacted soil was stockpiled on plastic and temporarily stored on-site. An estimated 25-gallons (.79 bbls) was released and the volume of soil impacts are estimated to be approximately 10yd³. Figures and photos are attached. Further assessment is required to determine the extent of soil impacts. GPS coordinates and additional information will be provided in future submittals. Assessment and remediation efforts are on-going.
