General Comment:

CECMC Inspection Report Summary

On Monday 3/24/2025, I, Inspector Scott Ramsey, conducted a routine inspection/audit at TEP GGU Miller MDP 6, at Location # 416979 in Garfield county Colorado. Shaun Kellerby was also on the inspections/audits with myself.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad. No evidence of a tracking pad on location.

We were escorted by lead pumper through locked gate and he also followed us around locations.

During this inspection the following compliance issues were observed:

1. Access road rock check dams are in need maintained.
2. Chemical tank containment is leaking, possibly chemical staining because pumps for chemical are also leaking. Stained soils around chemical containment.
3. Unused poly piping around location.
4. Random debris (B/H caps)
5. Open rat hole
6. Some tank labels are illegible.

Refer to photograph of observed compliance issue.

A follow up on this site inspection may be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.

LocationOverall Good: ☐
