Comment: This location does not comply with Rule 1004. During this inspection, it was observed that the location appears to have been contoured and graded to reflect adjacent topography. However, pipeline risers remain on the south side of the former tank battery and need to be removed. The former tank battery and well locations consist primarily of unstabilized/bare soils and debris from undesirable vegetation (russian thistle/tumbleweeds). Additional reclamation activities are required to comply with Rule 1004.

Corrective Action:	Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.	Date _____
