Operator Comments:

KMOG is requesting approval to install a permanent 15hp instrument air skid at the Clark Tank Battery 35C-11HZ (location 323227). This installation will reduce emissions and the environmental impact of the facility by providing instrument air, instead of natural gas, to operate pneumatically controlled valves.

The instrument air skid installed at this location and will provide instrument air to operate the facility equipment for the following wells: Clark 13N-11HZ, 35C-11HZ, and 35N-11HZ (location 425386).

Additionally, KMOG is requesting approval to install a small, permanent micro instrument air skid, housed in a cabinet measuring approximately 3'x5' on the Clark 35C-11HZ well pad (location 425386) located north of the facility. This micro air skid will provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Clark 13N-11HZ, 35C-11HZ, and 35N-11HZ.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attached plot plan for details.

KMOG plans to install the new equipment on May 31, 2025.
