## REQUEST FOR CLOSURE

**Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.**

- Basis for Closure:
- Corrective Actions Completed (documentation attached, check all that apply)
    - Horizontal and Vertical extents of impacts have been delineated.
    - Documentation of compliance with Table 915-1 is attached.
    - All E&P Waste has been properly treated or disposed.
  - Work proceeding under an approved Form 27 (Rule 912.c).  
Form 27 Remediation Project No: \_\_\_\_\_
  - SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

**OPERATOR COMMENTS:**

All samples confirm spill cleanup. There is no evidence of impacted soils from oil and gas operations yet Barium in 2 samples is just over the Protection of Groundwater Screening Level by less than 22 mg/kg (considering background levels) and under the Residential SSL by 14,890 mg/kg. Further discussion on reasoning for using residential SSL is attached. Verdad requests the Residential SSLs for one analyte, barium on the floor sample, and on the south wall sample.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
