Comment:

Operator has recently performed final reclamation activities, with evidence of drill rows and straw crimped mulch. Germination of desirable species was observed throughout the disturbance area. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including storm water and weed management.

Inspection doc #714000107 observed risers in the western edge of the project area and required compliance by 8/19/2029. It was observed in this inspection that a gas line riser remains on location. Original CA has not been addressed. Original CA and date remains applicable. No CA date is being provided as this location is out of compliance for the same Rule.

Corrective Action:

Comply with Rule 1004.a to remove (regardless of ownership) all debris, abandoned gathering line risers, flowline risers, and equipment within three months of plugging (5/9/2017) the associated facility.
