1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% 21

TRANSECT RESULTS OF REFERENCE AREA% 33

TOTAL % OF DESIRABLE VEGETATION COVER 64

VEGETATIVE COVER FAIL

Comment:

There are areas along the former access road and location that have not revegetated to at least 80% cover of reference area levels. There were noxious weeds beginning to emerge (Field bindweed) along the access road and location which were not observed in the reference area. There is a berm and areas of subsidence of the former pit at the north side of the location that will need to be backfilled and regraded. It is advised that noxious weed control should be performed prior to performing reseeding. Overall, it appears vegetation cover has increased since the previous inspection. Continue to monitor and maintain the location until final reclamation is achieved.

Corrective Action:

Comply with 1004 Rules.

Date **05/18/2025**

Overall Final Reclamation
