Spill/Remediation:

Comment: The previous spill that was observed on 1/28/25 has been reported with a form 19 submitted on 3/13/2025. There was a leak at the heater treator that spilled hydrocarbon mist along the west side berm. The spill flowed to the southeast corner of the location. There was also a condensate leak that occurred from the fiberglass tank and flowline shed. It appears this leak overtopped the berm at the southeast corner.
At the time of this inspection there were still stained impacted soils observed from the previous spills.

Corrective Action: Control and contain spills/releases and clean up per Rule 912.a.
Comply with Rule 912.b and form 19 (404124147) Conditions of Approval.
