Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	NA	Lab Analysis if Encountered
Yes	SOILS	10' X 10' X 6' BGS	Lab Analysis and Field Screening

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the OCOMA G25-16 wellhead cut and cap and flowline removal. Approximately 954' of flowline was abandoned-in-place due to field constraints in accordance with Form 44 document #403487308. The wellhead was cut and capped per ECMC rules. Since the flowline is abandoned in place, soil samples will be collected using a hand auger in accordance with the proposed site investigation map attached to this Form 27.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Five (5) grab soil sample were collected at the base of the excavation and the area showing the highest degree of impact during field screening activities at the wellhead excavation. Additionally, soil samples will be collected at the directional changes of the abandoned in place flowline per the COA on ECMC document number 403196275. Two (2) soil samples were collected at the A and B points of the flowline during abandonment. Soil samples were analyzed by a certified laboratory for TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons) organic compounds in soil per ECMC Table 915-1, and EC, SAR, pH, and boron. Additionally, three (3) soil samples collected from the wellhead excavation were analyzed for metals in soil per ECMC Table 915-1. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered during the site investigation a grab groundwater will be collected and analyzed for all organic compounds and inorganic compounds per ECMC Table 915-1.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Visual inspection of the wellhead and flowline areas occurred during abandonment activities. Field personnel field screened all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling was required. The ECMC Flowline Closure and Wellhead Closure Checklists were utilized and filled out during the abandonment process.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

NA / ND

Number of soil samples collected 16 -- Highest concentration of TPH (mg/kg) 1446
 Number of soil samples exceeding 915-1 12 -- Highest concentration of SAR 1.24
 Was the areal and vertical extent of soil contamination delineated? No BTEX > 915-1 Yes
 Approximate areal extent (square feet) 200 Vertical Extent > 915-1 (in feet) 6

Groundwater

Number of groundwater samples collected 0 NA Highest concentration of Benzene (µg/l) _____
 Was extent of groundwater contaminated delineated? No NA Highest concentration of Toluene (µg/l) _____
 Depth to groundwater (below ground surface, in feet) _____ NA Highest concentration of Ethylbenzene (µg/l) _____
 Number of groundwater monitoring wells installed _____ NA Highest concentration of Xylene (µg/l) _____
 Number of groundwater samples exceeding 915-1 _____ NA Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected
 _____ Number of surface water samples exceeding 915-1
 If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?
 Background samples were collected for comparison to site inorganic and metals concentrations and will be summarized following receipt of analytical results. The background boring locations are illustrated on Figure 2.

Was investigation derived waste (IDW) generated as part of this investigation?
 Volume of solid waste (cubic yards) _____ Volume of liquid waste (barrels) _____

Is further site investigation required?
 Supplemental site investigation activities were conducted on February 4, and 5, 2025, to confirm the absence of hydrocarbon impacts along the flowline and to confirm Table 915-1 compliance at the previously collected soil samples at the wellhead. Analytical results are still pending at the time of this submission and the results of the SSI will be submitted on a subsequent Form 27. The soil boring locations are illustrated on Figures 1 and 2.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.
 A remedial excavation was completed between May 17, 2024 and May 20, 2024 to remove soil impacted with hydrocarbon compounds identified during the wellhead decommissioning in samples WH-SS-01 @ 5', WH-SS-02 @ 5', and WH-FS-01 @ 6'. Excavation confirmatory soil samples were collected and analyzed for Organic Compounds in Soil per ECMC Table 915-1, arsenic, barium, and lead, in accordance with the approved amended sampling plan (ECMC Document #403609905). Based on the results of the remedial excavation, all soil impacted with hydrocarbon compounds above ECMC Table 9151 protection of groundwater soil screening levels was successfully removed. A summary of excavation activities was included in ECMC Document No. 403918792.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.
 The final remedial excavation extent measured 30-ft by 30-ft by 9-ft bgs. A total of 300 cubic yards of soil was transported off-site for disposal at the Waste Management Buffalo Ridge Landfill in Keenesburg, CO.

Soil Remediation Summary

In Situ Ex Situ
 _____ Bioremediation (or enhanced bioremediation) _____ Yes _____ Excavate and offsite disposal

_____ Chemical oxidation
_____ Air sparge / Soil vapor extraction
_____ Natural Attenuation
_____ Other _____

If Yes: Estimated Volume (Cubic Yards) _____ 300
Name of Licensed Disposal Facility or ECMC Facility ID # _____ 160000
_____ Excavate and onsite remediation
_____ Land Treatment
_____ Bioremediation (or enhanced bioremediation)
_____ Chemical oxidation
_____ Other _____

Groundwater Remediation Summary

_____ Bioremediation (or enhanced bioremediation)
_____ Chemical oxidation
_____ Air sparge / Soil vapor extraction
_____ Natural Attenuation
_____ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater was not encountered during decommissioning or excavation activities.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other _____

Request Alternative Reporting Schedule:

Semi-Annually Annually Other _____

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report
 Other 1Q25 Timeline Update _____

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policy MWZZ 316714) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Noble makes no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining cost for this project to be: \$ 50000 _____

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No _____

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards _____ 300

E&P waste (solid) description Soil _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: Waste Management Buffalo Ridge Landfill _____

Volume of E&P Waste (liquid) in barrels _____ 0

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No _____

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 07/03/2025

Proposed date of completion of Reclamation. 01/03/2026

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 10/06/2022

Actual Spill or Release date, or date of discovery. 01/25/2023

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 01/16/2023

Proposed site investigation commencement. 02/04/2025

Proposed completion of site investigation. 02/05/2025

REMEDIAL ACTION DATES

Proposed start date of Remediation. 02/05/2025

Proposed date of completion of Remediation. 07/03/2025

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

The implementation schedule is being updated to accommodate completion of supplemental site investigation activities. The supplemental site investigation was conducted on February 4, and 5, 2025. The results of the SSI will be submitted on a subsequent Form 27, after analytical results are received from the laboratory.

OPERATOR COMMENT

This Form 27 is being submitted as a first quarter 2025 timeline update for supplemental site investigation activities at the Ocoma G25-16 wellhead location.

A summary of excavation activities performed at the wellhead was included in a previously submitted Supplemental Form 27 (Document No. 403918792). Per the COA issued in the aforementioned approved form, the Form 44 document number is 403487308 and is included in the related forms. In addition, the flowline was abandoned in place between soil samples FL01-A and FL01-B as shown in the attached Site Map. The field notes summarizing decommissioning activities were included in ECMC Document Number 403417186.

Supplemental site investigation activities were conducted on February 4, and 5, 2025, to confirm the absence of hydrocarbon impacts along the flowline and to confirm Table 915-1 compliance at the previously collected soil samples at the wellhead. Analytical results are still pending at the time of this submission and the results of the SSI will be submitted on a subsequent Form 27. The soil boring locations are illustrated on Figures 1 and 2.

Quarterly reporting will be conducted until closure criteria are achieved for the remediation project. The results of the supplemental site investigation will be submitted on a subsequent Form 27.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Jesse Marcus
