Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At 5:05 PM on January 28 a 3rd party operator notified Wexpro of a production gathering lateral failure approximately 150 yards from Wexpro's Powder Wash field office. Wexpro operators had left for the day at 4 PM and the leak was not occurring at this time. Operations mobilized to the field and isolated the leak approximately an hour after notification. Production fluids were observed to have surfaced at the leak location and run downhill over frozen ground for roughly 40 yards. No waterways were impacted.
