What caused the spill?	under investigation

## Narrative

**Include specific incident information and mitigation actions taken to stop and clean-up the spill/release**

Verdad Resources received an ECMC Field Inspection Report (Doc # 713301877) conducted on 3/26/2025 with a corrective action to report a spill or release. After further investigation, it is believed that there was a spill or release in the past that was not reported to Verdad Management, or the spill occurred prior to Verdad ownership of the well and facility. All the production equipment that is currently on site appears to be in good working condition. Further investigation will continue to take place while the spill/release remediation is completed. Cleanup efforts are scheduled to start on April 8th 2025.

**Acknowledgement**

I acknowledge that a written follow-up notice must be submitted to Weld County OEM/LEPC as soon as practicable after the release. The follow-up notice must update information included in the initial notice and provide information on actual response actions taken and advice regarding medical attention necessary for citizens exposed.
