Comments:

The former HSR-VAN SCHAACK 4-11 well (API: 05-001-09285) was P&A'd on September 12, 2016, as identified in Form 6, Document Number 401119006. On April 4, 2025, Ensolum conducted a final reclamation inspection for the former HSR-VAN SCHAACK 4-11 well pad (Location ID: 320424) and determined that the site is compliant with final reclamation requirements per ECMC Rule 1004.

During the inspection it was observed that the former HSR-VAN SCHAACK 4-11 well is located within an active residential construction site, under the operational control of Harper Brothers Construction. The associated tank battery located 0.1-mile north of the P&A'd well site, has since been reclaimed and is also located within the active construction site. All associated road base and equipment related to oil and gas activities have been removed from the well location. Ensolum personnel located the P&A wellhead location using a handheld Trimble DA2 Global Positioning System (GPS) unit and latitude and longitude coordinates obtained from the ECMC online database. A general Site Location Topographic Map is included as Figure 1; and the Site Map displaying the location of the reclaimed site on aerial imagery is included as Figure 2. Photographs of the P&A location were taken facing each cardinal direction from the P&A wellhead location. The photographic log is included as Attachment 1.

The previous land use for the former HSR-VAN SCHAACK 4-11 well is defined as a dryland farm field per ECMC document number #360775. The land use has changed and is now an active construction site for a residential subdivision. Based on rule 1004.d, a Form 4 Sundry Notice requesting final reclamation status has been prepared for the submittal to the ECMC.
