Laramie intends to remote "frac" the wells on the CC 0697-15-08 (481743) pad by staging "Frac" equipment on Laramie's E&P Waste Management Facility "Pond G"(437578) using the pond as the water source for the completions significantly reducing or eliminating the need for tanks and trucking on the 15-08 pad. See additional comments under submittal.

Operator Comments:

The original plan outlined in the OGDG was to stage the "frac" equipment and "frac" tanks on the 15-08 pad itself and supply the equipment with completion water via surface and buried waterline infrastructure. Staging the equipment at Pond G eliminates the need for "frac" tanks, associated trucking they entail, and significantly reduces the number of locations a leak or spill might occur by eliminating the pipe manifold required for the tanks. Flowback and produced water transport will remain the same, and will be piped back to Pond G via buried lines. Laramie has SPCC and Storm water plans in place for Laramie's Cascade Creek operations area where all of these activities are taking place.  
CPW was consulted and has approved this proposal and the correspondence will be attached to the subsequent form 4.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
