**Good Housekeeping:**

Type	WEEDS		
Comment:	Cheatgrass an annual weedy noxious species was observed throughout interim reclamation areas. This species has the ability to spread off location and impact native shortgrass prairie ecosystems. Cheatgrass management can be a challenge when establishing desirable perennial grasses. Cheatgrass management is commonly applied in the fall prior to emergence, or at early post-emergent stage.		
Corrective Action:	Operator shall submit a Weed Management Plan to control cheatgrass via a Form 4 Sundry Notice.	Date:	06/27/2025

Overall Good:

1003 f. Weeds Noxious weeds? F

Comment The previous inspection observed both desirable and weedy, annual vegetation. Since the previous inspection weedy, annual vegetation has taken over much of the north and east interim reclamation areas. It appears the Operator has failed to perform weed management.

Corrective Action Operator shall perform weed management.
