### LOCATION CHANGE COMMENTS

Comments:

Final reclamation of the C21 Well Site was completed in 2015. The reclamation area was recontoured, topsoil was redistributed, and the disturbance was seeded with a dryland pasture seed mix requested by the surface owner. Additional seeding was completed in 2020 and 2022. 2024 qualitative and quantitative monitoring shows that final reclamation of the disturbance is successful and a self-perpetuating plant community has been reestablished that approximates adjacent reference area cover. Please see the attached third-party vegetation survey report for additional details.

**Operator Comments:**

Through continued monitoring, QB Energy has determined final reclamation of this location is complete per Rule 1004. The Location Facility Status remains Active in COGIS. Two Related Facilities (IDs 159215 and 159216) are also Active in COGIS. This is identified in ECMC inspection #692402804. These UIC Disposal Facilities are the same wells identified under Location ID 334922 (API 0504508973 and 0504509003). All documentation associated with well plugging and abandonment is within Well Scout Card Documents under the APIs. It appears all related Facilities and the Location should have Closed status in GOGIS.
