VEGETATIVE COVER _____

Comment: Desirable species were patchy with bare ground throughout the location. The southern access road had the best observed establishment.

Much of the main access road has not been reclaimed and a final reclamation variance request is in-process to leave the access road in-place per the surface owner.

Corrective Action:	Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.	Date	05/30/2025
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
<p>Comment: At the time of this inspection, no stormwater erosion issues were observed at location. However, bare ground is observed throughout the location; therefore, the location is not stabilized. Performing additional reclamation activities will bring this location into stormwater compliance.</p> <p>Corrective Action: <input type="text"/></p> <p>Date: <input type="text"/></p>						
<p>Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
