General Comment:**ECMC Environmental Field Inspection Report Summary**

Any corrective actions from previous inspections, NOAVs and/or conditions of approval from previous forms that have not been fully addressed are still applicable. There were no operator or contract environmental personnel on location at the time of this field inspection. Photos attached to document site conditions.

Spill ID: 489863

Spill Name: Miller-62N67W 17SWSW

Remediation Project #: 39451

Location ID: 333209

Reported Date of Discovery: 04/16/2025

AND

Location Name: Miller 4-17 J Pit and Miller 24-17 Flowline

Remediation Project # 25332

Dates of Inspection: 04/22/2025 and 05/07/2025

Spill is located in close proximity to:

-Residential building units (closest ~400 ft southeast)

Current site status (as of 04/22/2025):

-Excavations have been backfilled at the former produced water vault, separator, and dump line locations.

-Soil stockpiles have been removed from the location.

-An open excavation was observed on location and appears to align with the Miller 24-17 flowline.

-Debris has collected within the excavation.

-Concrete barriers were observed near the excavation, but did not surround the perimeter. No excavation fencing has been installed.

-Meterhouse remained on location at the time of inspections.

Comment: Remediation Project # 39451 was created for decommissioning of the Miller-62N67W 17SWSW facility. Quarterly reporting is required under Remediation Project # 39451. Spill ID 489863 was created to address the remediation of impacts identified at the Miller-62N67W 17SWSW facility. Excavations have been backfilled. Remediation Project # 25332 was created for investigation of the historical Miller 4-17 J Pit and removal of the Miller 24-17 flowline. An open excavation was observed on location and appears to align with the Miller 24-17 flowline. Gray staining is visible on the sidewalls of the excavation. Quarterly reporting is required under Remediation Project # 25332.
