Operator Comments:

KMOG is requesting approval to install a permanent 15hp instrument air skid at the Cannon Tank Battery 1N-11HZ (location 425154). This installation will reduce emissions and the environmental impact of the facility by providing instrument air, instead of natural gas, to operate pneumatically controlled valves.

The instrument air skid installed at this location and will provide instrument air to operate the facility equipment for the following wells: Cannon Land 16-11, Cannon 1N-11HZ, and 2C-11HZ (location 332128).

KMOG will repurpose an out-of-service flowline to transport air from the facility to the Cannon 1N-11HZ well pad (location 332128). This will provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Cannon Land 16-11, Cannon 1N-11HZ, and 2C-11HZ.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attached plot plan for details.

KMOG plans to install the new equipment on June 9, 2025.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
