Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

While conducting tank battery removal activities at the Megan H 16-18,20,21 production facility, historically impacted soil was discovered at aboveground storage tank (AST) 01. The volume of the release is unknown. Assessment activities are ongoing. The historically impacted soil will be removed and disposed of and confirmation soil samples will be collected in compliance with ECOM Table 915-1. Additionally, a waste characterization sample of the impacted material has been collected and submitted for analysis of full ECOM Table 915-1 constituents. Analytical results will be provided in a subsequent report. The topographic Site Location Map showing the geographic setting of the release is provided as Figure 1.
