Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On May 27, 2025, a release was discovered at the Kerr-McGee 3-14 wellhead. The cause of the release was due to fluid daylighting from the subsurface adjacent to the wellhead during well servicing activities. Assessment activities are ongoing and will be summarized in a forthcoming Supplemental Form 19 Spill/Release Report. A topographic Site Location Map showing the geographic location setting of the release is provided as Figure 1.
