**COMMENTS:**

This well started mitigation in September 2023. The bradenhead test conducted 09/05/2023 (Form 17 doc# 403521582) reported 101 psi. Under the previous pressure management plan, bradenhead pressure has stabilized. Progress can be seen in the pressure trends (charts attached) and is verified by a passing bradenhead test on 4/21/2025 (Form 17 doc# 404180378) reporting 14 psi and a total volume of 0.0002 MSCF, flown at an initial rate of 4.71 MCF/D. For these reasons, Crestone is confident in the success of the PMP and is requesting that this well be returned to monthly monitoring and annual testing.
