Laramie Energy is submitting a Form 4 Sundry for the Layout Drawings and the Directional Well Plats for the approved Laramie 0993-29-01 well pad. In the original OGDG submission, Laramie had planned on a single row for well heads. Due to the capabilities of the rig which Laramie has acquired for drilling the Laramie 0993-29-01 well pad, the SHL of the well heads must be orientated in a dual row. The BHL of the 16 wells has not changed, only the SHL.

No changes were made to the perimeters of the well pad disturbance nor the equipment list.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
