RE: RE-ENTRY
WELL: UPRR 65 Amoco #1
3N 63W Section 1 NW 1/4
Weld County, Colorado
API 05-123-07316

Cervi Enterprises:

The referenced well located on your property and described above need to be re-entered and re-plugged to improve the integrity of each of the respective well bores. Prior to commencement of those operations, the Energy and Carbon Management Commission requires the Operator to inform you of its plans and to secure your agreement to the procedures. A plat is enclosed in order to provide the referenced well approximate known location. We need to locate the abandoned wellhead below grade, bring it back to the surface, and plug it according to the current rules and regulations. Once this is completed, Kerr-McGee Oil & Gas Onshore LP ("KMOG") will cut it below grade and reclaim all disturbed areas to, as near as reasonably practicable, the condition that existed immediately prior to the re-entry work performed. KMOG also agrees to repair and return any roads damaged by the work to the condition they were in immediately prior to the re-entry work. The location of the re-entry well generally depicted and labeled on the images attached hereto.

Please acknowledge your receipt of this notice and your consent to access and perform the proposed operations by signing, dating and returning this letter to the undersigned.

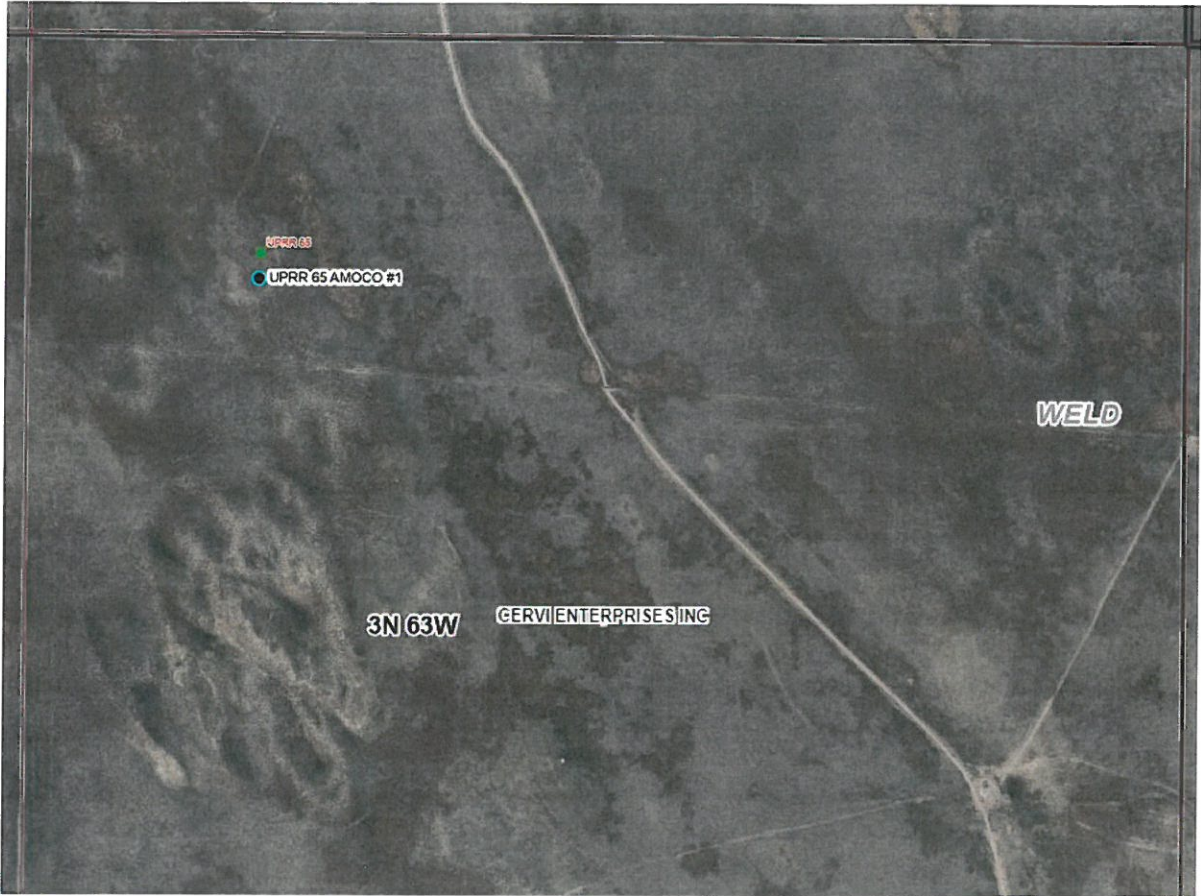

If you have any questions or concerns regarding this matter, please do not hesitate to contact me directly at (208) 420-1592.

Sincerely,

Vince Gerrish
Kerr-McGee Oil & Gas Onshore LP
