TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: This location does not meet Rule 1004 requirements. Bare or weedy patches are present at the former tank location and wellhead area. Gravel is present around the wellhead area. The former evaporation pond has a depression in the center, possibly because of subsidence or improper recontouring. Vegetation establishment in and around the evaporation pond is lower than the surrounding area. Desirable vegetation is present on portions of the location and weeds appear to be controlled at the time of inspection. See attached pictures.

Inspector Name: Dunnam, Anthony

Corrective Action:	Conduct additional reclamation according to Rule 1004 such as removing gravel, recontouring/ decompaction, and reseeding as required.				Date	
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>	Multi-Well Location	<input type="checkbox"/>
