## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A site investigation was conducted pursuant to ECMC Rule 911 at the CPC FERGUSON CHEWY UPRC T5N-R64W-S23 L01 Tank Battery location. Fourteen (14) grab soil samples were collected from the produced water vessels excavation (10), beneath the ground oil tanks (3), and at the separator (1). Soil samples were analyzed by a certified laboratory for full Table 915-1. One (1) waste characterization soil sample was analyzed for ECMC Table 915-1 metals. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

Additional grab soil samples were collected to delineate previously identified exceedances. Additional background soil samples were collected from soil of native/similar lithologic material not impacted by oil and gas activity to further compare applicable inorganics and metals and soil suitability parameters. These additional soil samples were collected on March 13 2025 analytical results are pending from the laboratory. Results will be provided on a subsequent SF27 submittal.
