ECMC INSPECTION SUMMARY:

FIR Document Number: 714002164  
Inspection Date: 05/13/2025 FIR Submit Date: 05/16/2025 FIR Status:

Inspected Operator Information:

Company Name: NUEVIDA RESOURCES LLC Company Number: 10764  
Address: 5950 CEDAR SPRINGS RD STE #100  
City: DALLAS State: TX Zip: 75235

LOCATION - Location ID: 484496

Location Name: Ardourel 33081718 Number: County:  
Qtrqtr: Lot 3 Sec: 18 Twp: 33N Range: 8W Meridian: N  
Latitude: 37.101193 Longitude: -107.767596

FACILITY - API Number: 05-067-00 Facility ID: 484496

Facility Name: Ardourel 33081718 Number:  
Qtrqtr: Lot 3 Sec: 18 Twp: 33N Range: 8W Meridian: N  
Latitude: 37.101193 Longitude: -107.767596

CORRECTIVE ACTIONS:

1 CA# 204869

Corrective Action: Comply with rule 912.a, clean spill/impacts to table 915.b concentrations. Date: 06/19/2025

Response: CA COMPLETED Date of Completion: 05/30/2025

Operator Comment: Cathodic protection equipment was recently installed by Phelco as it was deemed necessary (after survey) to manage potential corrosion at the wellheads and flowlines. The color difference noted in the pictures of the soils is due to the soils from the trench where the anodes were placed for the cathodic protection. Soils are not contaminated, therefore no sampling/analysis is required. The sawdust around the area was removed.

ECMC Representative: \_\_\_\_\_

**7** CA# 204875

Corrective Action: Install cap or plug, or other BMP to prevent wildlife access to the pipeline (including birds and bats), as well as to prevent any fluids from discharging from the pipeline. Date: 05/26/2025

Response: CA COMPLETED Date of Completion: 05/30/2025

Operator Comment: Installed cap on end of pipe.

ECMC Decision: \_\_\_\_\_

ECMC Representative: \_\_\_\_\_

**8** CA# 204876

Corrective Action: Comply with rule 1002 Install or repair required BMPs. Date: \_\_\_\_\_

Response: CA COMPLETED Date of Completion: 06/12/2025

Operator Comment: NVR representative met with Horizon Environmental on site 6/12/2025. Horizon noted that the site has sufficient vegetation growth to serve as a vegetative buffer for sediment, such that BMP's such straw wattles and bales are no longer necessary. NVR will keep the current wattles and bales in place and allow for natural degradation. NVR will manage (repair) rills, erosional surfaces and rip-rap areas as needed during the active operating months as designated by the CPW, May 1st through November 30th each year. Specific erosional areas and rills on-site will be addressed with re-seeding efforts (and matting if needed) in the fall. Re-seeding this time of year (summer months) will not be successful
