## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to COGCC Rule 911 a site investigation was conducted pertaining to the SHELTON 18-25XX wellhead cut and cap and flowline abandonment. Approximately 639' of flowline will be abandoned-in-place. The COGCC will be updated in a supplemental Form 27 if a portion of the flowline is able to be removed. The wellhead was cut and capped per COGCC rules on 27 July 2023 under REM # 28440. The flowline was removed per COGCC rules on 8 September 2023 under REM #28440. One soil sample was field screened along the flowline, while a soil sample was collected during decommissioning activities of the adjacent facility under REM #28542.

On 27 July 2023 a soil sample was taken at the wellhead excavation. Soil samples were field screened at the N-E-S-W sides of the wellhead. The soil sample was analyzed by a certified laboratory for the full extent of Table 915-1, including: TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per ECMC Table 915-1 EC, SAR, pH, metals, and boron. All samples were analyzed by a certified laboratory using approved ECMC laboratory analysis methods. No background samples were collected in association with the closure activities.

**OPERATOR COMMENT**

This submittal serves as a 3Q25 SF27 quarterly update at the SHELTON 18-25XX (REM 28440) site wellhead cut and cap and flowline removal via confirmation soil sampling results from initial excavation activities on 27 July 2023 conducted at the wellhead cut and cap and flowline removal.

All ECMC Table 915-1 standards were met; however, the sample was not analyzed for ECMC Table 915-1 metals. A secured, verified analytical report for the wellhead sampling was attached to the Form 27 Document No. 404152946. Based upon these results, further supplemental site investigation activities will be conducted to assess ECMC metals at the form SHELTON 18-25XX wellhead location.

The findings of this assessment, as well as any additional actions required, will be provided in subsequent supplemental form 27 submittals. In addition, supplemental form 27s will continue to be submitted on a quarterly basis.

Pursuant to Rule 913.e, quarterly reporting will continue for the location until data indicates no further action is warranted.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
