Operator Comments:

KMOG is requesting approval to install a small, permanent micro instrument air skid housed in a cabinet measuring approximately 3'x5' on the Camp 28C-25HZ well pad (location 327230). This skid will reduce emissions and the environmental impact by providing instrument air, instead of natural gas, to operate the pneumatically controlled wellhead valves for the Camp 2C-25HZ, 16-25, 28N-E25HZ, Camp Federal 35-25, and Camp Federal 37-25 wells.

This request is related to sundry 404230069, which requests the installation of a 15hp instrument air compressor skid at the Camp 27C-25HZ facility (location 319308). The instrument air skid will provide instrument air to operate the facility equipment for the following wells: Camp 1N-25HZX, Camp 27C-25HZ (location 319308), Camp 2C-25HZ, 16-25, 28N-E25HZ, Camp Federal 35-25, and Camp Federal 37-25 (location 327230).

No additional flowlines will be installed to this well pad, as the 15hp compressor is set at the facility and the micro air skid is installed on the well pad. This micro air skid will supply instrument air to operate the pneumatically controlled wellhead equipment for the Camp 2C-25HZ, 16-25, 28N-E25HZ, Camp Federal 35-25, and Camp Federal 37-25 wells.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attachments for details.

KMOG plans to install the new equipment on July 31, 2025.
