COMMENTS:

In preparation for a MIT, a pre-MIT was performed on the Federal 299-34-1 well to evaluate the integrity of the production casing. The production casing failed this evaluation and TEP subsequently tested the production casing with a bridge plug and a packer, and identified a hole in the production casing between 3,092 and 3,124 feet. TEP plans to plug and abandon this well within six months of the completion of production casing evaluation (June 26, 2025) and is preparing a Form 6-NOI for submittal to the ECMC. Please find daily Well Operations Reports included within the attachments detailing the activities performed on June 23rd and June 24th, 2025. This Form 4 is being submitted per the direction of ECMC's Aaron Katz following a phone conversation that occurred on July 1st, 2025, with TEP engineering staff.
