**This Warning Letter is to inform you that KP KAUFFMAN COMPANY INC (“Operator”) may be in violation of the rules and regulations of the Colorado Energy and Carbon Management Commission (“ECMC”) and corrective action is required.**

ECMC has reasonable cause to believe that Operator has committed one or more violations of the Oil and Gas Conservation Act, or of a rule, regulation, or order of the Commission, or of a permit issued by the Commission. Operator is required to comply with this Warning Letter by the **Corrective Action Deadline Date(s)** to resolve the alleged violation(s). Failure to do so will result in the issuance of a Notice of Alleged Violation and initiation of enforcement proceedings in which ECMC will seek monetary penalties for the alleged violations pursuant to § 34-60-121, C.R.S. and Rule 525, ECMC Rules of Practice and Procedure, 2 CCR 404-1.

#### **Alleged Violation(s) and Required Corrective Action(s):**

##### 912.b. Reporting Spills or Releases of E&P Waste, Gas, or Produced Fluids

Violation Date: 07/08/2025

Violation Discovery Date: 07/08/2025

Description of Alleged Violation: On July 8, 2025, ECMC staff met representatives of a 3rd party and KP Kauffman on location (Insp Doc No 714300184) to determine the responsible party of a historical spill related to flowline ID 478843 discovered during decommissioning of the adjacent EMERSON-62N67W/29SWNE location (Remediation Project No 35614).

ECMC records indicate that KPK is the owner of the pipeline/flowline’s present in the open excavation and is therefore the responsible party on record of the discovered spill (Facility 9 flowline system; Form 44 Document No 402536813). KPK has indicated that the Facility 9 flowline was purchased from DCP and that this segment of the system was not part of the quit claim; KPK has submitted Form 44 Document No 404269951 (In Process) for this assertion.

ECMC staff walked the mapped line path to the east and west of the spill location and discovered markers and utility locates for both KPK and DCP lines in the area. Signs to the east of the spill location indicate KPK operates lines of both 8” and 10” diameter, which is consistent with the GIS layer supplied by KPK in Form 44 Document No 402536813.
