**ECMC Comments**

Comment	User	Date
<p><span style="color: blue;">Records show well was PA 2014; well was also the source for the 7CSE Domestic Tap #480938.</span></p> <p><span style="color: blue;">No form 44 has been submitted since previous inspection doc #714000108 was submitted on 12/29/2023. Corrective action remains applicable.</span></p> <p><span style="color: blue;">It was observed in this inspection that the Location has met ECMC 1004 Final Reclamation and Revegetation standards. However, records show that the 7CSE Domestic Tap is still "Active". On 6/2/2021, Operator submitted Form 44 #402547692, and though Operator's comments within the Form indicate that the domestic line and equipment has been removed, the Form was submitted to Register the Facility, not close it; Operator will need to submit a subsequent Form 44 to formally close the Facility.</span></p> <p><span style="color: blue;">It is also noted that the Form 44 submitted does not include accurate Point of Delivery information; specifically, the GPS Locations for the Point of Delivery have not been provided. This information will also need to be submitted within the new Form 44 pursuant to Rule 216..</span></p> <p><span style="color: blue;">Final Passing of the Location is pending closure of the Domestic Tap facility.</span></p>	mcdonouc	07/14/2025
