## **INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pursuant to ECMC Rule 911 a site investigation was conducted pertaining to the SITZMAN 27-08 wellhead cut and cap and flowline removal. As documented in Supplemental Form 27 # 404161310, the wellhead was cut and capped on 5 May 2023. On 8 May 2023, five (5) grab soil samples were field screened at the former wellhead and in the N-E-S-W directions, with one soil sample collected at the former wellhead submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron.

As documented in Form 44 # 403652360, approximately 182' of flowline was removed on 20 June 2023. On 15 November 2023, three (3) soil samples were field screened along the former flowline with one (1) soil sample collected at the terminus of the flowline submitted to a certified laboratory for analysis of ECMC Table 915-1 organic compounds, EC, SAR, pH and boron.

## **PROPOSED SAMPLING PLAN**

### **Proposed Soil Sampling**

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Confirmation and delineation soil sampling will be conducted by collecting one (1) soil sample at the former wellhead and four (4) soil samples in the N-E-S-W directions. Two (2) soil samples will be collected at both ends of the flowline. All soil samples will be analyzed by a certified laboratory for ECMC Table 915-1 soil compounds using approved ECMC laboratory analysis methods. Three (3) background soil samples will also be collected and analyzed by a certified laboratory for ECMC Table 915-1 SSR and metals.

### **Proposed Groundwater Sampling**

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during the site investigation a grab groundwater will be collected and analyzed for all organic compounds per ECMC Table 915-1.

### **Proposed Surface Water Sampling**

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## **Additional Investigative Actions**

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Visual inspection of the wellhead and flowline areas will occur during abandonment activities. Field personnel will field screen all disturbed areas using visual and olfactory senses to determine if laboratory confirmation sampling is required.
