(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work June 2, 1972

This well was originally drilled by Anschutz and Equity, Aug. 1971. We re-entered this hole to washdown below the "J" sandstone to a depth of approximately 6200 feet, land and cement 4-1/2", 11.0% casing and to use a two stage collar so the Fox Hills aquifer would be sealed off. However, the wash down operations exited from the old hole and since we still have not re-entered the old hole at 6201 feet, we want to abandon at this point and shift the rig 150' due south of the old hole in order to drill a new hole which will be called the Qualls No. 1-X.

In accordance with "Letter of Agreement", signed by the landowner, Mr. H. R. Qualls, in which he states his intention of converting the surface conductor into a domestic water well, a cement plug of sixty sacks has been placed at 786 to 600 feet. A copy of this "agreement" accompanies this notice.

Also change operator from Royal Drilling Company to Marlin Production Company so that our bond can be released.
