17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work June 2, 1972

This well was originally drilled by Anschutz and Equity, Aug. 1971. We re-entered this hole to washdown below the "J" sandstone to approximated 8200 feet, land and cement 4 1/2", 11.6# casing and to use a two stage collar so the Fox-hills aquifer would be sealed off. However, the wash down operations exited the old hole and since we still have not re-entered the old hole at 6201 feet, we want to abandon at this point and skid the rig 150' due south of the old hole in order to drill a new hole, Qualls No. 1-X.

(Also change operator from Royal Drilling Company to Marlis Production Company and Rocky Mountain Drilling Company.)
