**COMMENTS:**

Citation Oil and Gas Corp. (COGC) conducted a bradenhead test on May 15th. Casing pressure = 38 psig; tubing pressure = 30 psig; bradenhead pressure = 4 psig. Analytical data indicated thermogenic gas; however, subsequent monitoring tests revealed that the bradenhead bled down to zero. The pressure data does not indicate any casing integrity issues. Therefore, COGC proposes to conduct monthly bradenhead tests for the next 3 months to verify/confirm the monitoring results subsequent to the May 15th bradenhead test.
