(Other) Commingle D & J Sands <input checked="" type="checkbox"/>		(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)	

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

18. Date of work Proposed \* Must be accompanied by a cement verification report.

Gulf Energy requests approval to commingle in the well bore the "D" and "J" production in this well. This well was perforated and frac'd in the "J" Sand last month. The well was swab tested at an approximate rate of 10 BO and 75 MCFG per day. A retrievable BP was set above the "J" perfs and the "D" Sand was perforated and frac'd. The well is now recovering load oil.

We expect the well will be put on pump sometime in the near future and we therefore want to produce these two zones together to maximize production and economics.

Schematics of present and proposed completions are attached along with a plat of the area.

A copy of this Sundry Notice and attachments has been sent to Sohio Petroleum by certified mail as they are the only other operator with a producing well within a 1/2 mile radius.

19. I hereby certify that the foregoing is true and correct
