CORRECTIVE ACTIONS:

1 CA# 205960

Corrective Action: Comply with Rule 1004 to perform additional reclamation activities at the well and tank battery locations and perform weed management. Date:

Response: CA COMPLETED Date of Completion: 10/31/2025

Operator Comment: For optimal control of Bromus tectorum (cheatgrass/downy brome), PADCO plans to apply herbicides in the fall of 2025 (October '25) as a pre-emergent, and again in the Spring when plants are in the two to three leaf stage (based on recommendations by Oregon State University and Montana State University). Repeat treatment:

Cheatgrass is persistent, so it may require multiple herbicide applications to get well-established cheatgrass under control.

ECMC Decision: _____

OPERATOR COMMENT AND SUBMITTAL

Comment: PADCO plans to apply herbicides in the fall of 2025 (October '25) as a pre-emergent, and likely again in early Spring '26 when plants are in the two to three leaf stage (this is based on recommendations by Oregon State University and Montana State University). PADCO will repeat treatment, as necessary. Cheat grass is persistent, so it may require multiple herbicide applications to get well-established cheat grass under control.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
