Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**PROPOSED SAMPLING PLAN**

**Proposed Soil Sampling**

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Per ECMC Rule 913.b., two (2) confirmation soil samples will be collected within the historic spill path. One confirmation soil sample will be collected near the former sediment trap location (SW extent) and the other confirmation soil sample will be collected on the former pad location where the former frac tanks were staged (NE extent) as shown on the Site Map in DN 403928539. Confirmation soil sample depths will be collected at the pad elevation at the time the release occurred. Sample depths are anticipated to be collected at 1-foot below ground surface (bgs) (SW location) and 6-feet bgs (NE location). The confirmation soil samples will be collected using a hand auger and field screened with a photoionization detector (PID). The confirmation soil samples will be submitted for laboratory analysis of full ECMC Table 915-1 constituents. The proposed confirmation soil sample locations are depicted on the attached Figure 1 of this Form 27 (DN 404287537) which is labeled at "SITE MAP".

**Proposed Groundwater Sampling**

**Additional Investigative Actions**

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Pending analytical results background samples may be collected as part of the investigation. If impacts are identified sampling will continue horizontally and vertically until delineation is achieved.
