Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 3/12/2025, Roger 1 wellhead decommissioning activities were completed. During the completion of the activities, no potential presence of impacted material(s) was observed/smelled. Consistent with Rule 912, samples were collected and analyzed to determine whether any constituents are present at levels in excess of Table 915-1 standards. Final laboratory analytical results received on 4/2/2025 indicate that soil samples, WH01, discovered at the wellhead, exceeded ECMC Table 915 standards for naphthalene at 0.0123 mg/kg. Groundwater was not encountered during decommissioning activities. Operator was notified by the consultant of this release on 4/16/2025 and acknowledges that this notice is not being made within 24-hours of the discovery date. The supplemental Form 27 has been submitted for remediation number 31416 detailing the remedial site plan, document number: 404167994.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 06/26/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

Historical impacts were discovered during wellhead decommissioning activities at the base of the wellhead excavation. The volume of impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

PDC conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this wellhead is no longer active and is in the process of being decommissioned. The wellhead has been taken out of service, and there is no longer a possibility of a release originating from this infrastructure.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment
 Other (specify) _____

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: Corrective Actions Completed (documentation attached, check all that apply)

Horizontal and Vertical extents of impacts have been delineated.

Documentation of compliance with Table 915-1 is attached.

All E&P Waste has been properly treated or disposed.

Work proceeding under an approved Form 27 (Rule 912.c).

Form 27 Remediation Project No: 31416

SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

The operator acknowledges this spill is out of compliance with Rule 912.b reporting requirements. A historical release was discovered on 4/2/2025 during decommissioning activities; however, the consultant didn't notify Chevron of the discovery at that time. Chevron was notified by consultant of the release on 04/16/2025. As a result, 24-hour notifications were not made, and a Form 19 was not submitted within 72 hours of the release discovery.

During initial wellhead decommissioning activities on March 12, 2025, no indications of a historic release were observed. However, while the analytical results were received on April 2, 2025, the naphthalene exceedance observed in sample WH01 wasn't identified until April 16, 2025, upon review of the analytical tables. Entrada is taking action to prevent future occurrences of historical releases being reported past the 24-hour deadline.

The supplemental Form 27 has been submitted for remediation number 31416 detailing the remedial site plan, document number: 404167994.

No attachments were included since final lab data and a final data packet was in the form 19 I/S: document number, 404168838.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
