INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

One (1) grab confirmation soil sample was collected at wellhead excavation. Soil samples were analyzed by a certified laboratory for Table 915-1 compounds, EC, SAR, pH, and boron. One (1) waste characterization soil sample was collected for ECMC Table 915-1 metals analysis. All samples collected were analyzed by a certified laboratory using approved ECMC laboratory analysis methods.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

A site assessment was completed on 12/6/24 to delineate soil impacts at the former wellhead. Soil samples were collected for analysis for Table 915-1 compounds, EC, SAR, pH, metals, and boron. Additional background samples were collected from soil of native/similar lithologic material not impacted by oil and gas activity to further compare EC, SAR, pH, boron, and ECMC Table 915-1 metals, as needed. Laboratory analytical data pending receipt and review.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

A site assessment was completed on 12/6/24 to delineate soil impacts at the former wellhead. Soil samples were collected for analysis for Table 915-1 compounds, EC, SAR, pH, metals, and boron. Additional background samples were collected from soil of native/similar lithologic material not impacted by oil and gas activity to further compare EC, SAR, pH, boron, and ECMC Table 915-1 metals, as needed. Laboratory analytical data pending receipt and review.

Operator will propose in the excavation work plan additional sample collection for delineation confirmation.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

No current source was generated. Residual petroleum hydrocarbon impacts are being delineated through an environmental site assessment, pending laboratory results. Remedial excavation activities will be proposed once the recent data is evaluated. An additional excavation work plan will be proposed in a subsequent form submittal.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Site assessment activities to delineate residual petroleum hydrocarbon impacts at the site were completed on 12/6/24. Additional remediation will be proposed in a supplemental 27. NFA will be considered when soil concentrations are in compliance with ECMC Table 915-1 standards. Laboratory analytical data pending receipt and review.
