Notes: No Rule 411 buffer zones or Public Water Supply System facilities are present within 2,640 feet of the working pad surface. No surface waters within 2,640 feet of the working pad surface are 15 miles upstream of a Public Water System intake. Based on field observations and a wetlands test pit, there are no ponds or wetlands present on the well pad or tank pad. Surface water features in the immediate vicinity of the pad were evaluated and adjusted based on field observations. Surface water features outside of the immediate vicinity of the pad are based on the USFWS National Wetland Inventory.

Legend	
	Tank Pad Working Pad Surface
	2,640 ft Buffer
	Feature Distance and Bearing Line
	Water Well
	Freshwater Emergent Wetland
	Freshwater Pond
	Riverine
	Downgradient Wetland
	Upgradient Wetland
