Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On 5/15/2025, the potential presence of impacted material(s) was identified via hydrocarbon odor, and hydrocarbon staining during decommissioning activities at the Segal 8-2-24, wellhead, samples: WH01, WH01-E & FL01R-W all located at the wellhead are from the same wellhead excavation. Final laboratory analytical data indicated a historical release was discovered at the Segal 8-2-24 decommissioned wellhead. FL01R-W exceeded ECMC Table 915 standards for 1,3,5-trimethylbenzene at 0.014 mg/kg. The volume of potentially impacted material(s) is not currently known. Groundwater was not encountered during decommissioning activities. Form 27 has been submitted for remediation number 39581 detailing the remedial site plan, document number: 404207108.

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 08/12/2025

Root Cause of Spill/Release Unknown (Historical)

Other (specify) _____

Type of Equipment at Point of Spill/Release: Wellhead Line

If "Other" selected above, specify or describe here:

Describe Incident & Root Cause (include specific equipment and point of failure)

The potential presence of impacted material(s) was identified during wellhead decommissioning activities at the east sidewall and base of the wellhead excavation. The volume of potentially impacted material(s) is not currently known. Due to the historical nature of the release, an exact cause was not able to be identified.

Describe measures taken to prevent the problem(s) from reoccurring:

PDC conducts routine AVO inspections of all oil and gas facilities in order to identify and mitigate potential releases. Further, this wellhead is no longer active and is in the process of being decommissioned. The wellhead has been taken out of service, and there is no longer a possibility of a release originating from this infrastructure.

Volume of Soil Excavated (cubic yards): 0

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment

Other (specify) _____
